Team 1 SCRUM 1
Project: **BPDA | Brazilian Community Census Analysis**
Members: **Carter Vande Moore, Simon Lu, Angela Tran, Andrew Tuckman**

Task completed this week:

This week, we met with the overall census analysis team and we had discussed how we would get certain tasks done that are needed for Project Deliverable 1 and we discussed how we would get around any problems that we thought we might encounter. For tasks, we decided that we would split the data between our two teams, with our team taking 1970, 1980, and 1990. Each member on our team is working on a certain decade's data, with one decade being assigned to two members. As for problems, our first problem is that we were unsure how we would get the PDF of data into CSV form. However, we were able to find that Adobe has a way of doing this, and BU offers us Adobe for free. Angela was able to find another way where you upload the data into Excel and then convert it into a CSV there. For the 1980s, Angela was able to find data about "citizenship and year of immigration for foreign-born persons by country of birth", but not by gender, age, or income, like we were hoping (so that we could see these trends throughout the years). Therefore, we have another problem that we are going to figure out before the next deliverable is due.

Plan for next week:

This weekend, Andrew and I will be looking at 1990s data, and Simon will look at 1970s data to see if any more useful information is provided and all report on what we found in our preliminary analyses of the data. All four of us plan to meet to try and come up with a key question for our project.

Client meeting recently:

Latest client meeting was on 10/8 Friday 9am where we all introduced ourselves and were given a rundown of what is wanted out of the project. See SCRUM 0 for more info.

Next Client meeting:

Next client meeting will be on 10/22 Friday 9am.
